"IF YOU'VE USED GOOGLE STREET VIEW, THEN YOU'LL KNOW HOW TO USE PLANTVR"

SHARE SITE INFORMATION WITH EXTERNAL PARTNERS

Allow design and construction contractors to collect the required information without travelling to site, thereby reducing costs associated with running a remote operation.

SHUTDOWN SCOPING & WORKPACKS

An incomparable tool for maintenance planners to plan shutdown tasks correctly, effectively and efficiently. A consolidated display of plant information can aid understanding before any site operative carries out a task.

COMMUNICATION TOOL AMONGST WORKFORCE

See the whole picture – the most effective form of communication transfer is visual. A visual and informative technique to communicate mission critical data and ideas. A new and exciting way for employees to converse on a common platform and foster bonds between staff across disciplines and offices..

ENGINEERING DESIGN & REVIEWS

PlantVR can unlock site information that can't be captured by traditional means, reducing costs involved with site visits and inspections. Engineers and management can be granted remote off-location access to a visual inspection design review tool.
